Rollins has provided over 5,000 Bear-Proof Haul-All containers to BC clients alone.

The Haul-All container is used in over 250 national, state, and provincial parks across Canada and the US. Because of Haul-All's reliability, the BC government has standardized the container.

Concerned homeowners are now taking an important step to reduce conflicts between people and bears by using *residential* bear-proof containers!

Designed for residents, farms, and acreages, our residential bear-proof containers:

- *Safely secure garbage, pet food, waste, and other materials from bears and other wildlife.

- *Are a cost-effective method for communities and municipalities that are interested providing a bear-proof waste management program.

- *Can be rolled with ease to different locations and are compatible with fully & semi-automated tipper systems (both Euro and NA tippers).

***Must undo Clasps*

Our strong IPL containers with the reinforced bear-proof system have been tested and certified by the Interagency Grizzly Bear Committee (IGBC), Montana Fish, Wildlife & Parks (FWP), and Living With Wildlife Foundation (LWWF).
